## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-33 drawn to a method for managing incoming and outgoing calls when the first call on a packet switch network was placed on hold by the first end point classified in class 370, subclass 260, 271.
  - II. Claim 34 drawn to a method for managing incoming and outgoing calls, detecting the call was placed on hold by the second endpoint, requesting the second end point not communicate music or prerecorded messages to the first endpoint, classified in class 379, subclass 215.01, 202.01 and 204.01.
  
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, Group I has a separate utility such as managing incoming and outgoing calls when the first call on a packet switch network was placed on hold by the first end point, establishing, over a second phone line a of the IP telephone a second call on the packet switched network, mixing a first incoming packet media stream from the first call with a second incoming packet media stream from the second call for presentation to a user of the IP telephone; while Group II has a separate utility such as

a method for managing incoming and outgoing calls, detecting the call was placed on hold by the second endpoint, requesting the second end point not communicate music or prerecorded messages to the first endpoint.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Chad C. Walters on 5/24/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quynh H. Nguyen whose telephone number is 571-272-7489. The examiner can normally be reached on Monday - Thursday from 6:15 A.M. to 4:45 P.M.
